

Porta

Porta is a luxury flap turnstile with elegant and light design: it is an embedded portal to the restricted areas. The turnstile casing can be made of different materials, including luxury one. Its gold coated design is a bestseller (titanium nitride coating). The turnstile is intended both for office premises and for subways. There is a Porta-SCP modification, which is intended for disabled people. This modification has a wider aisle and is equipped with additional sensors.

Swing turnstile
the aisle is blocked by means of swing flaps

Modern design
luxury turnstile, high quality of assembly and materials

Antipanic
the function of opening the turnstile flaps to free passage in emergencies

Features:

- The turnstile casing design provides easy access to mechanism for technical maintenance.
- The turnstile is operated by the external control panel or external controller of the access control system.
- The turnstile can be equipped with reader of 125 kHz RFID-cards or 13,56 MHz MIFARE® cards, or 1D/2D barcode scanner.
- The turnstile can be connected to the system via RS-485 interface, and can operate in on-line and off-line modes.

Design options:

Casing:	polished stainless steel
	brushed stainless steel
Flaps:	flaps made of high-impact glass
	flaps with plastic cover plates for wider pass

Overall dimensions:

Post height	1005 mm
Post length	1530 mm
Post width	153 mm
Passage width	700 mm
Passage width Porta-SCP	874 mm
Post weight	85 kg

Specifications:

Supply voltage	220 V ± 20%
Power consumption	80 W
Capacity	20 persons/ min and more
Torque of the flap mechanism	20 nm ± 10%
Working temperatures	0...+45°C
Dust and water protection rating	IP 40
